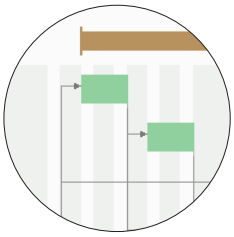
delay analyzer

Schedule Change and Delay Analysis for Primavera P6

Delay Analyzer Compares Schedules and Shows Which Changes Impacted the Finish Date

Steelray Delay Analyzer is breakthrough technology that performs a schedule change and delay analysis in seconds on two or more updates of the same Primavera P6 schedule. It is no longer necessary to sift through long lists of variances to try to figure out which ones impacted the finish date. Insights that normally take hours or days to uncover can be discovered in seconds with Delay Analyzer.

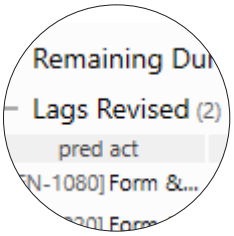


3D GANTT

Gain insights quickly by dragging the data date forward and back in time and observing as the 3D Gantt recalculates in real time.

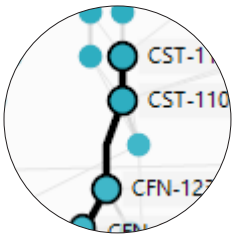
DELAY ANALYSIS

Delay analysis is now practical and cost-effective. Easily execute a delay analysis following AACEI recommended practices.



CHANGE ANALYSIS

Stop scrutinizing exhaustive lists of changes and focus on the changes that actually impacted the milestone(s) you care about.

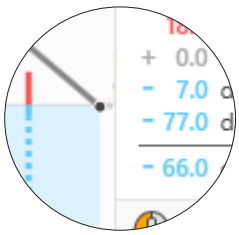


MILESTONE ANALYSIS

Analyze to the project finish milestone or any other milestone or activity that you care about. View critical and near-critical activities and milestones.

CRITICAL PATH ANALYSIS

Our reinvented network diagram visualizes how the critical path changes over time. Annotations provide easy-to-understand explanations of changes.



NEXT-GEN VISUALIZATION

Make better decisions and considerably reduce analysis time with advanced visualizations of the entire program and individual comparison periods.

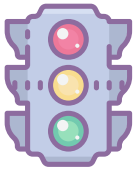
analyzer for p6

Schedule Health Analysis for Primavera P6

Analyzer For P6 Uncovers Schedule Quality Issues in Seconds

Is your schedule reliable? Steelray Analyzer for P6 (AP6) is a software application that performs a schedule health and performance analysis in seconds on two or more updates of the same Primavera P6 schedule. With Analyzer for P6, you can evaluate your project schedule for quality and performance in minutes and produce understandable and actionable results. Schedules can be analyzed against scheduling best practices as well as schedule checks published by DCMA, the (US Department of) Defense Contract Management Agency.

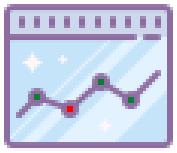


SIMPLE SCORECARD

Our innovative scorecard shows you the results of each check, using easy to read red, yellow and green indicators. Checks and reports can be customized.

FULL DCMA SUPPORT

Analyzer for P6 supports the schedule checks from the DCMA EVMS Compliance Metrics (DECM) as well as the older DCMA 14 Point Assessment.



TREND LINES

See schedule quality over time. Sparkline charts show scores over time in one simple chart. Hover over the chart to see individual scores for each schedule update.

BUILT-IN ENCYCLOPEDIA

Analyzer for P6 includes the Coach, a built-in scheduling encylopedia that explains each check in simple terms and advises you on next steps.

CUSTOMIZE THRESHOLDS

In Analyzer for P6, you can customize threshold values for the color indicators. If your organization has defined acceptable values, you'll be able to match them.

OFFICE INTEGRATION

From a report, you can generate an Excel version with just a few clicks. Reports can be copied to the clipboard and pasted into thousands of Windows applications.

steelray

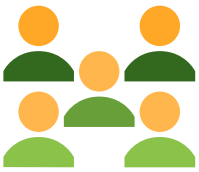
project viewer

Viewers for Microsoft Project and Primavera P6

For Team Members Who Only Need to View Microsoft or Primavera Schedules

Steelray invented the project viewer in 2000 and has continuously added innovations and improvements since then. There is no need to import or upload anything – simply open the file as you would with Microsoft Project or Primavera P6, and you'll see the same core views and data in the schedule.

We offer a free 10-day fully functional trial of Steelray Project Viewer, so download it today at **www.steelray.com.**



ENTERPRISE READY

Steelray Project Viewer is used by customers in the industries with the largest and most complex project schedules (e.g. Aerospace & Defense, Construction).

ENHANCED PRINTING

Preview before printing. Scale and see the effects on the output, Much easier than printing in Microsoft Project or Primavera P6.

SEARCH ENGINE

Find what you need rapidly with the first search engine integrated into a project viewer. Search activities, resources and dates.

PLATFORM READY

Microsoft Project 98 through Project 2019, Primavera XER, and Microsoft Excel.

1-CLICK NAVIGATION

Click on an activity and see its details. Select a resource name and see their activities. Click on a date and see what is starting, finishing and in progress.

EASY TO USE

An improvement on the original, not a clone of Microsoft Project or Primavera P6. Simplify project schedule data for all who need it.

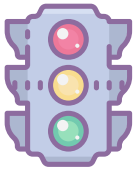
Schedule Analysis for Microsoft Project and Primavera P6

The Essential Schedule Quality Toolkit for Serious Scheduling Professionals

Steelray Project Analyzer is software that takes the pain out of schedule analysis and delivering high quality schedules. With Analyzer, you can evaluate your project schedule for quality and performance in minutes and produce understandable results. Schedules can be compared against earlier snapshots and checked against industry and internal best practices. Analyzer supports Microsoft Project and Primavera P6.



SIMPLE SCORECARD

Our innovative scorecard shows you the results of each check, using easy to read red, yellow and green indicators. Checks and reports can be customized.

FULL DCMA SUPPORT

Analyzer fully supports the schedule checks from the DCMA EVMS Compliance Metrics (DECM) v3.4 as well as the DCMA 14 Point Assessment.

SCHEDULE COMPARISON

Easily see what's changed between two schedules. In the report output, links allow you to navigate directly into the schedule.

BUILT-IN ENCYCLOPEDIA

Steelray Project Analyzer includes The Coach, a built-in scheduling encylopedia that explains each check in simple terms and advises you on next steps.

JUMP TO SCHEDULE

When activities are flagged by Analyzer, simply click on a link to filter those tasks in the native scheduling application (e.g. Microsoft Project, Primavera P6).

OFFICE INTEGRATION

Generating reports in Microsoft Office is a breeze with Project Analyzer. Analyzer includes reports that directly create Excel, Word, Web and Powerpoint files.

steelray

project exporter

Export Microsoft Project to IPMDAR

For ACAT 1A, 1C and 1D Programs with EVM Reporting Requirements

Steelray Project Exporter for IPMDAR is an add-in to Microsoft Project which exports Microsoft Project schedules to IPMDAR schedule performance data set files. The Integrated Program Management Data and Analysis Report (IPMDAR) is a contractually required report, prepared by the contractor, containing performance information derived from the internal Earned Value Management System. The IPMDAR provides status of the contract's cost and schedule performance (DI-MGMT-81861). The IPMDAR is being phased in to replace the Contract Performance Reports (DI-MGMT-81466) and the Integrated Master Schedule (DI-MGMT-81650).

FULLY COMPLIANT

Steelray Project Exporter is maintained to be compliant with the latest version of the IPMDAR File Format Specification.

FAST PEFORMANCE

Project Exporter uses Steelray Project Add-In, Steelray's speedy data extractor engine for Microsoft Project. Large schedules convert quickly.

QUALITY CHECKS

Exporter performs a number of data quality checks as it exports. It fixes many simple things that the specification is picky about.

ONE-CLICK FILTERS

Using technology from Steelray Project Analyzer, Exporter provides one-click filters to jump to tasks where issues were found.

MORE CUSTOMIZATIONS

Exporter provides a number of additional customizations, including the ability to use custom fields for mapping.

SUPPORTED BY STEELRAY

Project Exporter is backed by our world-class Atlanta-based support team. Help is one phone call or email away.
