Face the Change

Are we good enough? Do we need to change?

Solid Basics – the Controls Cycle

Techniques – Mature EVMS

Earned Value Management System

Techniques – Integrated Process Suite

Integrated business processes

Practical procedures aligned to processes

- Optimised through Lean
- Cradle to grave

Techniques – Risk & Trend Forecasting and BIM

Trending

BIM – Integrating
3D models with
4th (time) and 5th
(cost) dimensions

Technique – Surfacing Information through Technology

Access performance data through a Business Intelligence tool to explore high-level metrics and allow users to design custom views, drill-down or sample from specific control account sets or compare selected periods.

Data cube feeding Building Information Management (BIM) System for 4D & 5D

Tools, Systems and Data

Tools, Systems and Data

Core systems and Data

Single source of the truth

Systems integration model

> Technology improvements

Reporting tools

Data Warehouse and Management Information systems

Single sources for Key Project Data

People

Career path definition, standardised qualifications and professional recognition

The heart of good project controls

Adoption of Earned Value Management

Driven through a well defined WBS

Integration with best project and business management practice

Project Controls should answer three <u>key questions</u>:

- 1. Where are we now?
- 2. When is it going to finish?
- 3. How much is it going to cost?

Changing Face of Project Controls

- Techniques
- Tools and Systems
 - Cost, Schedule and Financial Management Y
 - Business Intelligence (BI)
 - Data Warehouse / Cube
 - > Building Information Modelling (BIM) Maturing quickly
- > Integrated processes Needs to be much better
- Sharing best practice throughout the industry Could improve
- Crystallising approach to developing Project Controls professional community *Disjointed*

Changing Face of Project Controls

Are we good enough? Do we need to change?

Adapt, Adopt and Apply

Changing Face of Project Controls

Thank you
