MACDONALD**

# About the topic

---

- ❑ London Waterloo is currently Britain's busiest station and links the country's most used railways
- ❑ WCP will bring 30% boost in peak-time capacity to and from Waterloo station by an Alliance of five companies
- ❑ This £602 million investment programme
- ❑ Involving 380 people daily and over 1000 people during peak construction

The presentation will focus on risk management strategy and processes that were implemented and supported this complex programme.

It will also highlight key wins and successes that we have achieved within 3+ years.

# 21st Century Battle of Waterloo

# Agenda

---

- WCA and WCP structures
- Programme interfaces and key risks
- RM Scope, Aims and Objectives
- Effective Risk Management (essentials and challenges)
- Summary of what was done
- Questions and Answers

# Wessex Capacity Alliance structure

---

**SKANSKA**

**AECOM**

**WESSEX  
CAPACITY  
ALLIANCE**

**M**

**COLAS RAIL**

# Wessex Capacity Programme

*Waterloo International Terminal (WIT)*

*10 Car Suburban and Mid-platform Stairs*

*Vauxhall*

*Rail Systems*

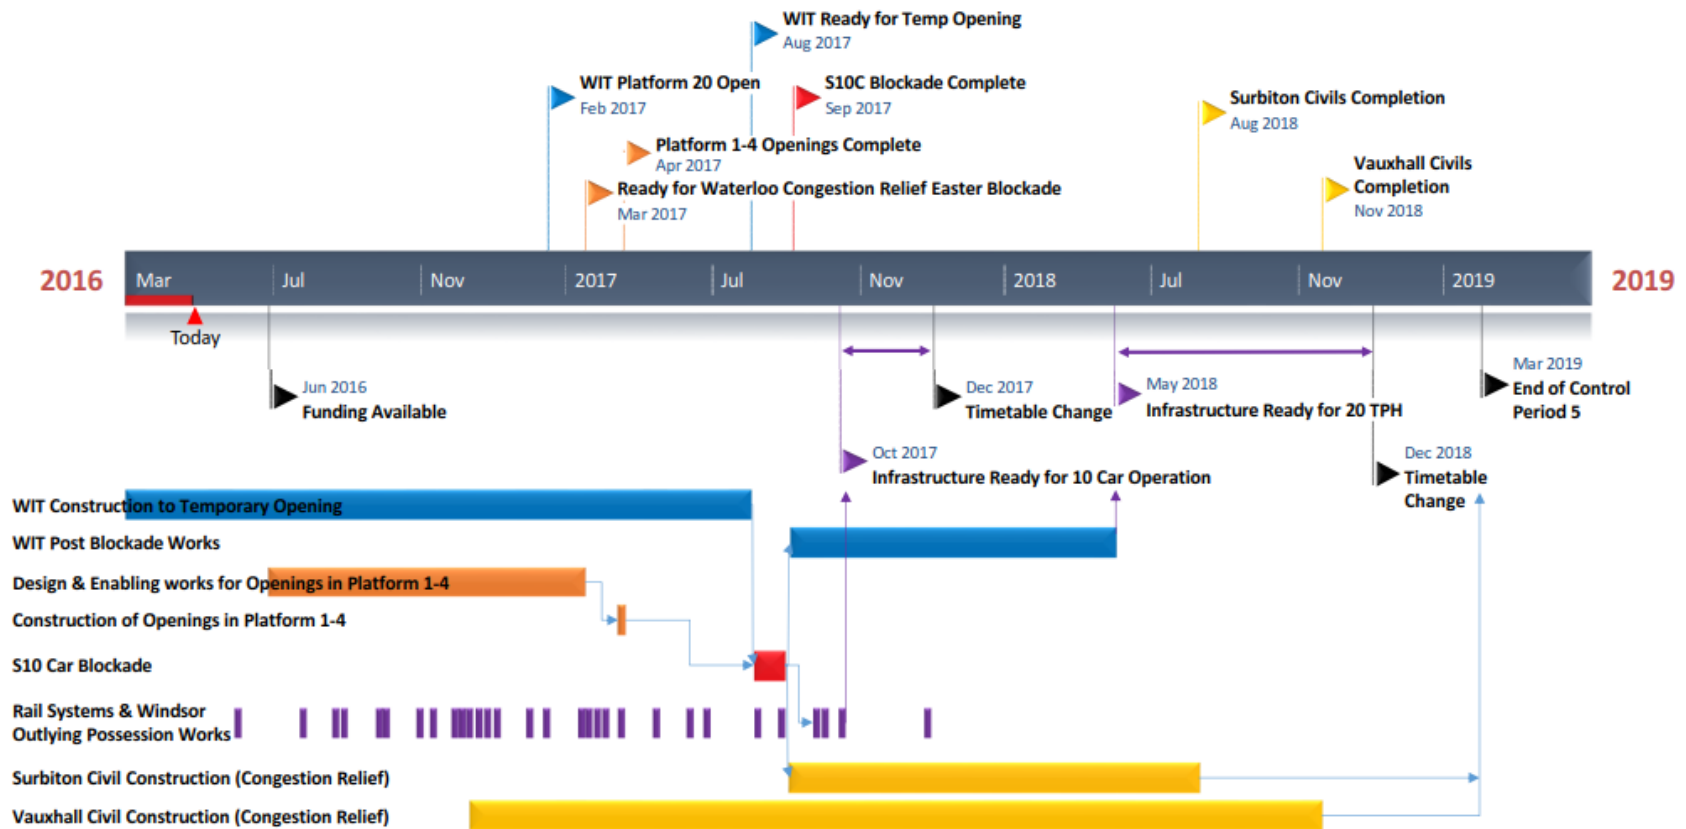

*Power Upgrade*

*Windsor Outlying*

# WCP Internal Project Interfaces

# Key Risks – interface risks

*Internal and External*

---

➤ <i>Interface with other NR projects</i>	<i>WCP is part of £800mln Programme</i>	<i>Maintenance</i>	<i>RAM</i>
<i>Train Operating Co (SWT and SWR)</i>	<i>Station Operations</i>	<i>London Underground</i>	<i>NR Operations</i>
<i>Signallers</i>	<i>Public</i>	<i>Unions</i>	<i>Department for Transport</i>

# RM Scope, Aims and Objectives

---

*The key aim of the WCA risk management process is to provide an effective framework taking into account **Alliance principles** and **current procurement strategy** in order to enable **informed decision making** during the programme delivery.*

---

**WCA Risk Management Plan**

# Effective Risk Management

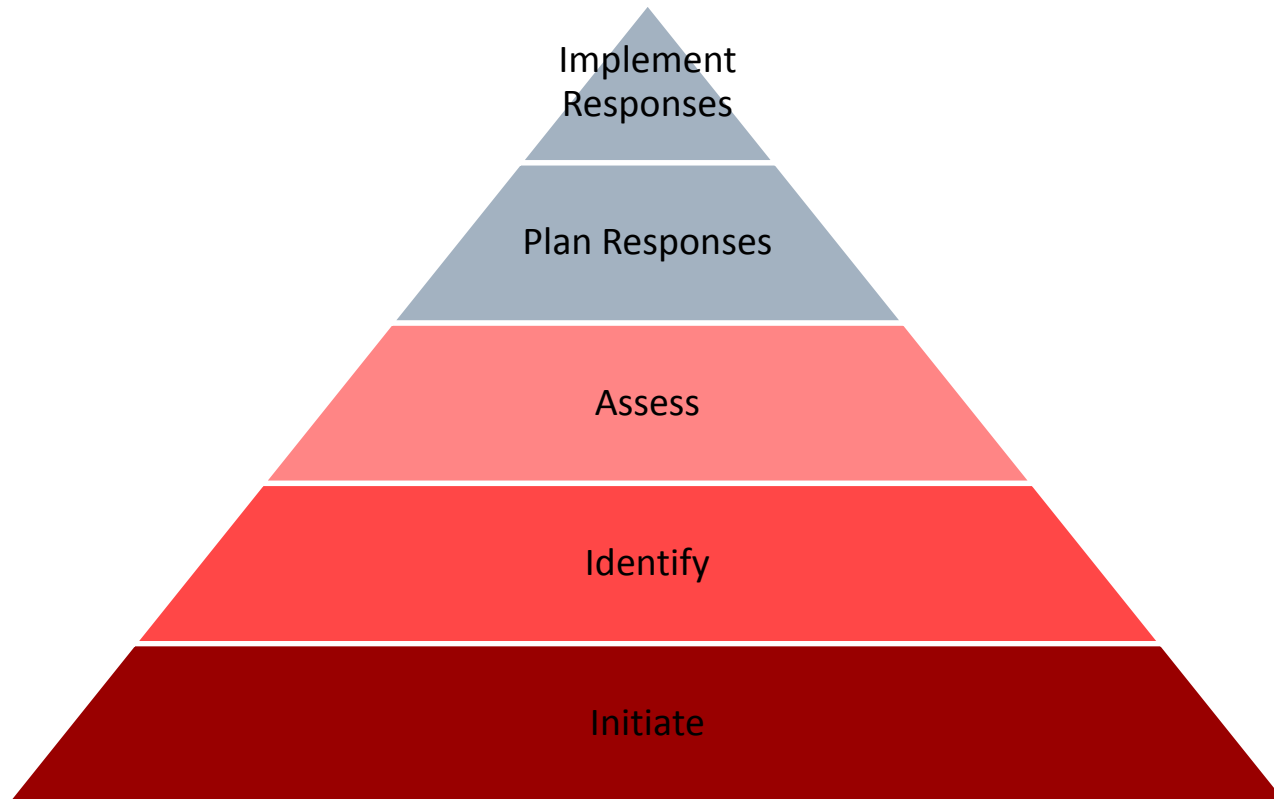

## *Key essentials and our challenges*

---

- RM Framework
- Understanding boundaries – WCA contract and risk hierarchy
- Risk culture
- Fully integrated within different disciplines
- Risk team
- Support from senior management
- Data driven

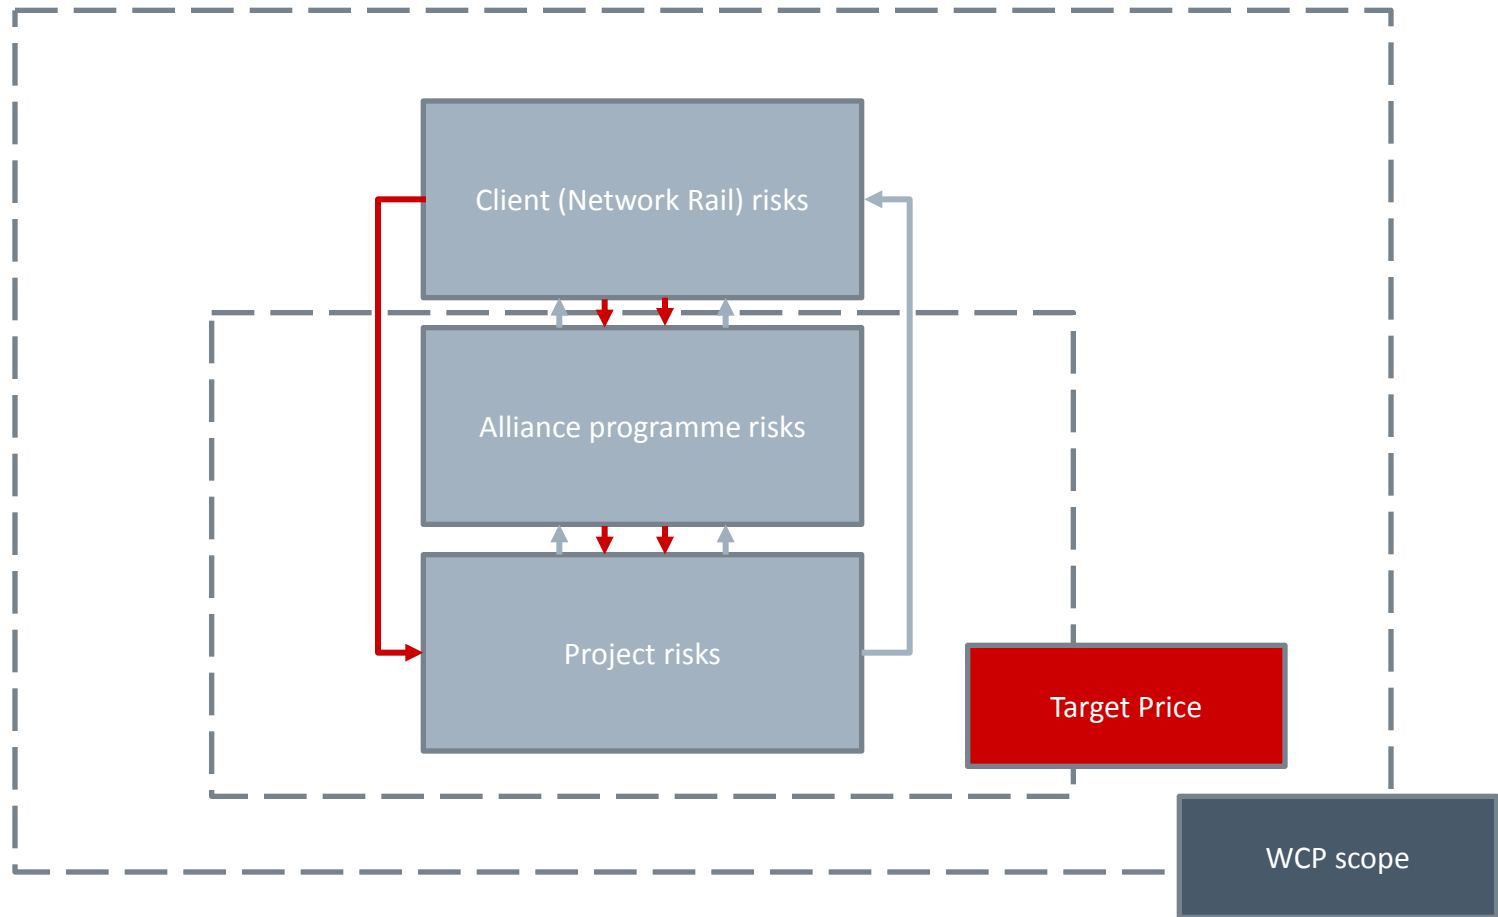

# Effective Risk Management

## *WCA RM Framework*

# Effective Risk Management

Understanding the boundaries (i.e. contract and hierarchy)

# Effective Risk Management

*Fully integrated within different disciplines*

# Key WCA risk impacts

*...and their management*

## ➤ *Cost Increase*

- *Monitoring cost risk deliverability*
- *QCRA periodically*

## *Project/Programme delays*

- *DWWP QSRA for red rated possessions*
- *QSRA for key milestones*
- *Other unique analysis to assess issues/risks*

## *Impact on Operations*

- *Again managed by DWWP process*
- *Contingency planning*

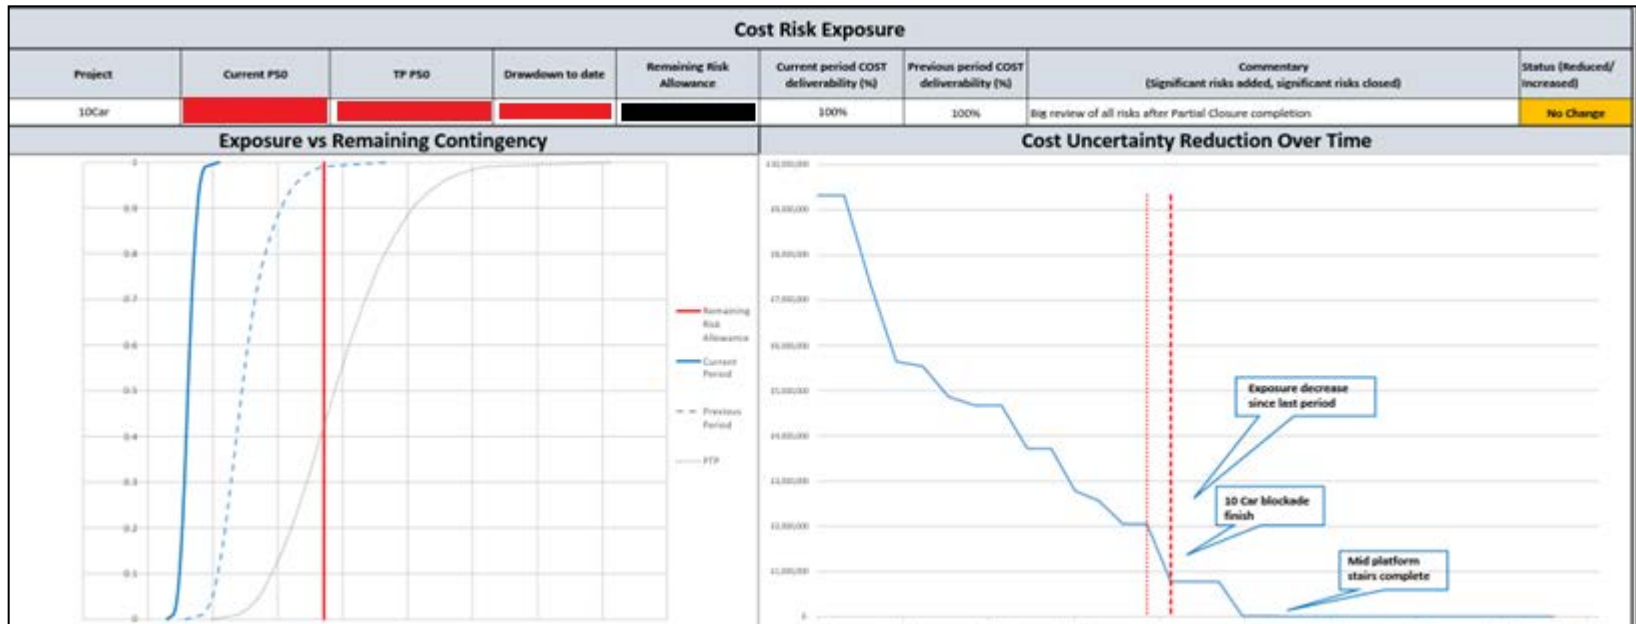

## *Reputational Impact (for all parent companies)*

- *Managing mentioned impacts*
- *In house Stakeholder and comms team*
- *Making sure that potential future disputes are resolved*
- *Making sure we are delivering what we said we will...*

# WCA Risk dashboards

## Part 1 – Managing Cost risk Exposure

# WCA Risk dashboards

## *Part 2 – Categorisation of risks*

- By Risk Breakdown Structure (RBS)
- By Work Breakdown Structure (WBS)
- By Action owner

# WCA Risk dashboards

## *Part 3 – Top risks*

- Top Cost Risks
- Top Current period risks
- Top Schedule risks

# Summary of what was done

---

➤ *Central risk team  
(managing both  
Alliance & Client Risks)*

*Working  
Collaboratively with  
'best for project' in  
mind*

*Implementing best  
practice, not just  
parent companies  
procedures*

*Analysis of the historic  
data*

*We read and  
understand the  
contract*

*Chain of events are  
established instead of  
having too generic  
risks*

*We used QRA to  
analyse risks*

*We used bespoke QRA  
methods to  
understand risk*

*Customised reports for  
effective risk  
management*

*Improving internal  
processes by analysing  
them (planning, cost  
management &  
change)*

# Questions and Answers time

---

Thank you!
