

Benefits & Use of BIM/Digital Construction to Project & Organisational delivery

Nick Leach – Head of Digital Construction

- Worked for Sir Robert McAlpine for 4 years
- Involved in Construction Industry for past 20 years
- **MCI**OB Chartership awarded with Chartered Institute of Building
- **BSI BIM Project information practitioner (ISO19650)** – certification
- **UK BIM Alliance affiliates Co-lead (Current)**

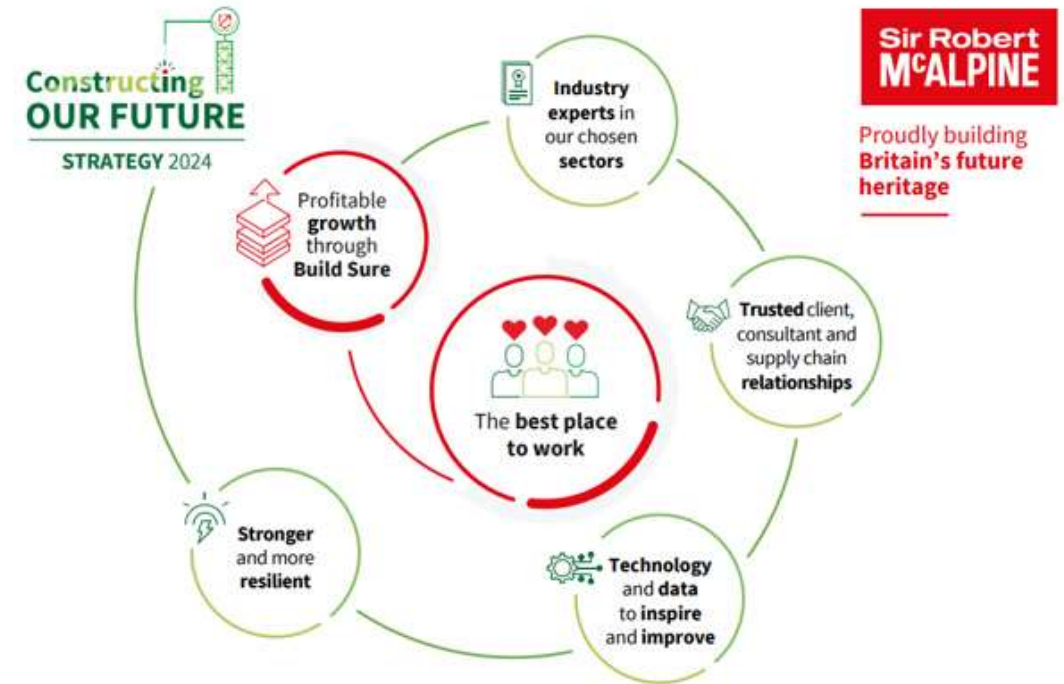

Agenda

- Overview of the SRM journey - our digital construction/BIM strategy - Q&A - **30mins**
- A view from a project overview of projects in how digital construction/BIM is bringing benefits and efficiencies - Q&A - **30mins**
- Break – **20 mins**
- Breakout sessions with hands on learning and demonstrations – **1:40mins** – attendees divided in 5 groups. Groups then rotate every **20mins**:
 - Basic navigation and use of site Model viewers (Dalux) – How we use on site, training our teams and wider supply chain
 - Overview and fly through of use of 360 image capture – Matterport/Ricoh (benefits its brought especially during pandemic)
 - 4D use – how it supports our work winning, tendering, logistics and programme validation
 - VR – Utilisation for Design validation and sign off
 - Managing coordination – Our process, tools used and data reporting
- Break – **20mins**
- Summary and recap – Including what's happening in the UK construction industry – **20mins**
- Feedback/Q&A – **20mins**

Sir Robert M^cAlpine

- Established in 1869
- First contract the repair of a mine chimney for £2.45
- £1b turnover in 2019
- 1800 employees
- Launched 2018 our five-year strategy supporting our ambition to be: **the Best Builder & Best place to work**

Our reputation is founded on 150 years of technical excellence and innovation, our entrepreneurial spirit and our future-focused approach.

Proudly building Britain's future heritage

How to Find out More

[Leading construction and civil engineering co. - Sir Robert McAlpine \(srm.com\)](https://www.srm.com)

Definition

Digital Construction (BIM) is not just technology, or 3D models. It is a way of working in the use of defined processes which underpin an integrated project team and a collaborative environment. Through the utilisation of *information management*, *digital tools* and *use of data* it will inform our decision making and support greater efficiencies

Mission Statement

To enhance the technical excellence and trusted experience of SRM to become...
...a pioneer and leader in digital construction - successfully delivering Britain's digital future.

Make digital construction tangible and understandable with clearly defined value.

What are the benefits? Why do it?

- Transparency across our business
- Business risk management
- Industry requirements & Legislation (Gov BIM Mandate 2016, Construction Playbook, Building Safety bill 2021 (Hackett report), TIP
- Commercial gains/protection
- Competitiveness
- Business Benchmarking

- Governance
- Project efficiencies
- Labour/Time savings
- Internal Business relationships
- Future proofing organisation
- Innovation
- Legacy and aftercare management

SRM BIM Strategy Adoption

Key Recommendations agreed in 2017:

- Establish a minimum Group Standard which is clear, consistent and cannot be diluted – **the SRM BIM Maturity Metric**
- Invest in new resources / new roles to manage the strategy and upskill the project teams
- Measure progress and report performance on a regular basis to drive ongoing engagement
- Provide a variety of learning resources to upskill and engage the project teams
- Enable project teams with the necessary software and technology hardware

Year 1 Target (2018): All new projects to reach a minimum **40%** target as measured against the SRM defined **BIM Maturity Metric**

Year 2 Target (2019): All new projects to reach a minimum **75%** target as measured against the SRM defined **BIM Maturity Metric**

Business Digital Construction/BIM Policy

“This policy applies to **all employees**. This includes (but is not limited to) all staff and operatives directly employed by Sir Robert McAlpine Limited.”

“The business 5-year strategic objective of Technology and Data to inspire is built upon the foundations of our **Digital Construction maturity strategy**.”

“We are committed to **delivering digital across all our operations** and seek to achieve this by driving positive attitudes and behaviours in our culture which is underpinned by leadership, collaborative ownership, and continuous improvement.”

“We expect....

- Allocation of **dedicated Digital construction resources on projects**”

Project Maturity Targets

Purpose of Maturity Strategy for our Business

“To improve our predictability, performance and transparency through enhanced efficiencies and consistency in our project delivery enabled by digitalised processes and technologies.”

The project maturity target is not meant to be a tick box exercise but the driver for our projects and personnel to adopt a more digitalised way of working.

Enablers required for Digital Construction (What we do)

- **Managing client deliverables** for the project
- **Forming/managing contractual requirements**/documents and processes
- **Training progress and capabilities** of projects teams on use of technology /software
- Ensuring **consistent** use of digital tools the business have identified
- **Managing monthly SRM maturity** reporting and project action plans/targets
- Supporting project **progress reporting and use of data**
- **Identifying solutions and innovations** to improve project delivery

Maturity Project Benefits

01 Communication & Engagement

- **Increased engagement & experience** with client team & stakeholders
- **Improved understanding & communication** of build to project team and supply chain

02 Design Development

- **Greater design assurity and productivity** from consultant and supply chain design teams
- **Improved transparency** of the feasibility and constructability of the design

03 Design Review

- **Earlier risk identification & evaluation** of design coordination/interfaces increasing quality of design & reducing rectification on site
- **Issue management & change control traceability & tracking** progress through digital platform & live dashboard reporting

04 Site Logistics Methodology

- **Enhanced site layout planning & optioneering**, greater visualisations & comms of work package zones & hazard identification in 3D virtual environment
- **Improved planning delivery** of riser, plant, temporary works logistics and vehicle analysis

05 Programme Validation

- **Optimum clarity of programme & understanding of viability** to all project team and stakeholders (4D planning simulations)
- **Programme assurity and business risk assessment** Comparing planned vs Actual progress

06 Health & Safety

- **Visual risk communication** and awareness to stakeholders, general public and site staff (site inductions)
- **Mitigation and identification** of project risks in design/CDM or potentially on site

07 Mobile Field Applications

- **Virtual site visits of project progress** – reducing travel/meeting costs, increasing productivity time & improving turnaround time on decision making
- **Digital as-built records captured** using photogrammetry collection tools to reduce potential commercial claims
- **Live project reporting and workforce productivity progress** through site data capture & performance sensors

08 Cost & Procurement

- **Reduced admin time** through use of model based quantification data extraction
- **Improved clarity on work package identification & scoping** information and procurement assessment

09 Performance Analysis

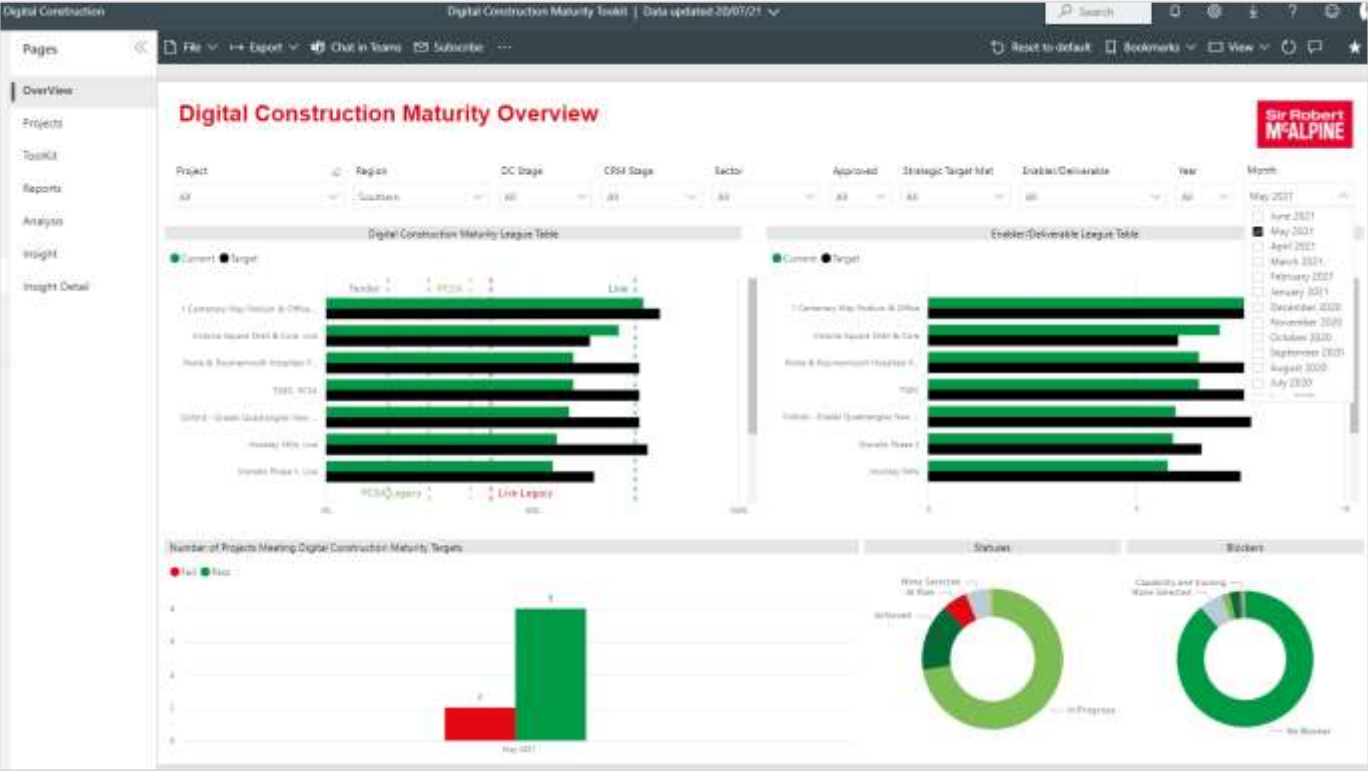

- **Supporting embodied carbon deliverables** and legalisation digital tool sets
- **Improving waste deduction** exercises with model quantification i.e. plaster board

10 Digital Handover

- **Digitalised completion records**, single source of truth for live and legacy information
- **Evidencing industry legalisation** requirements (Safety bill/golden thread)
- **Validating and tracking progress of Asset data** delivery and requirements

Project Maturity Targets

Monthly project Digital/BIM maturity reporting ongoing data collected ...

...results to be highlighted and reviewed at SRM Board level presented by assigned board sponsor

Project Maturity Targets

Further in depth analysis can be harness from the way data can be viewed...

Industry Alignment

superseded)

UK BIM FRAMEWORK

Guidance documents formed to
support ISO 19650 suite

SRM supporting UK BIM
Alliance & BSI working groups

Harmonise, digitise and
rationalise demand

We need to drive industry reform through our buying actions, and this Playbook sets out what we will expect (and will contract for) from industry, including continuous improvement in building and workplace safety, cost, speed and quality of delivery, greater sharing of better data, investment in training the future workforce through upskilling and apprenticeships, **and adoption of the UK BIM Framework**. To support this, suppliers should pass the principles and policies set out in this Playbook down through the supply chain.

Further embedding **digital technologies** including the UK BIM Framework and digital twins will improve the performance, sustainability and value for money of projects and programmes allowing for the effective retention and management of the **'golden thread'** of building information to be passed on from the design team to the facility operator via the contractor.

5. Further embed digital technologies

Apply the **UK BIM Framework** to standardise the approach to generating and classifying data, information security and data exchange, and to support the adoption of the Information Management Framework and the creation of the National Digital Twin.

What we are delivering as Function

- Delivering our client and our digital construction requirements through digital enabled **processes, methods and innovations** to support our project teams delivery
- Driving the use of our **digital tools and technology** across all project sites in all regions
- Harnessing and forming **automated** data production from our software toolset with Power Bi dashboarding to improve project delivery and business reporting
- Conducting and developing training, material and learning to support **Digital construction tools & technology competency** on our projects
- Continued **industry engagement, representation and participation** in built environment developments, communities, initiatives, roundtables and articles
- **Vendor Account management and administration** (Dalux/BIM Collab/Edocuments)
- **Cross project Peer to Peer reviews/audits** sharing of best practice and setting recommendations

Design

Use best practice, secure by default, information management and digital techniques to get data right from the start and design better-performing homes, buildings and infrastructure.

Build

Exploit new and emerging digital construction, information management, and manufacturing technologies and techniques to improve safety, quality and productivity during construction.

Operate

Use effective information management to transform the performance of the built environment and the services it delivers.

Integrate

Understand how the built environment can improve citizens' quality of life and use that information to drive the design and build of our economic and social infrastructure and the operation and integration of the services they deliver.

Health Infrastructure Plan
A Blueprint for Digital Innovation
in New Hospital Builds

GUILD LIVING

Statement: "Digital Maturity to be assessed for all projects, using Guild Living defined methodology"

To use the Digital maturity matrix as an enabler in the implementation and delivery across the Guild Living alliance project delivery.

Provides improved visibility for Client leadership into progress and information developed by the extended project building team in support of long-term decision making, improvements, productivity and benefits.

Recap/Summary

UK BIM FRAMEWORK

The UK BIM Framework was launched by the BSI, the Centre for Digital Built Britain (CDBB), and the UK BIM Alliance in **October 2019** to replace 'BIM level 2' as a framework for implementing best practice whole-life information management within the built environment

The overarching goal of coordinating the implementation of BIM /Digital in the UK through the partnerships with BSI, CDBB & UKBIM Alliance

Number of main institutes now affiliating with UKBIM Alliance to support their the UK digital agenda

Roadmap

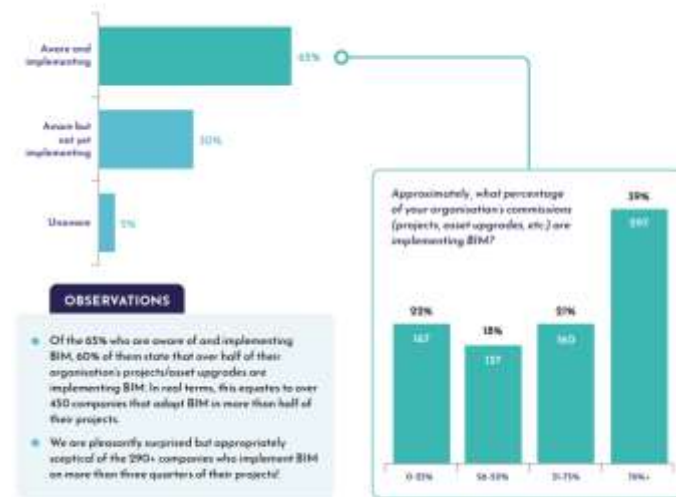

Key:

- Green Areas:** where existing practice and knowledge can be adopted or adapted to build capability.
- Orange Areas:** where practice and knowledge are being developed but more work is needed.
- Red Areas:** where there is little activity to develop the capabilities needed or where fragmented work needs unifying.

5.1. Is your organisation aware of and implementing BIM?

Purpose: Digital Construction/BIM - *The driver for our projects and personnel to adopt a more digitalised way of working. Improving our predictability, performance and transparency enabled by digitalised processes/technologies to enhance efficiencies and consistency in our project delivery. Supporting our client, internal and legislative requirements.*

Vision/Mission: Digital Construction/BIM – *SRM To be a leader and pioneer in digital construction making it tangible and understandable, with clearly defined value to all parties that are contributing and in turn enable greater efficiencies and outputs for all.*

People	Process	Technology	Reputation
We commit to providing the digital construction competency and development of our project staff, supply chain and client base. Ensuring the right Digital construction resources are assigned.	We commit to ensuring greater assurance & collaboration through our internal processes, aligned to industry requirements/legislation and maintaining external accreditation	We commit to improving project performance, efficiencies and consistency in the digital tools/technologies/data production: we use driving innovative best practice	We commit to promoting our expertise, strengthening our relationships with our stakeholders by demonstrating digital transformation best practice, knowledge & industry engagement

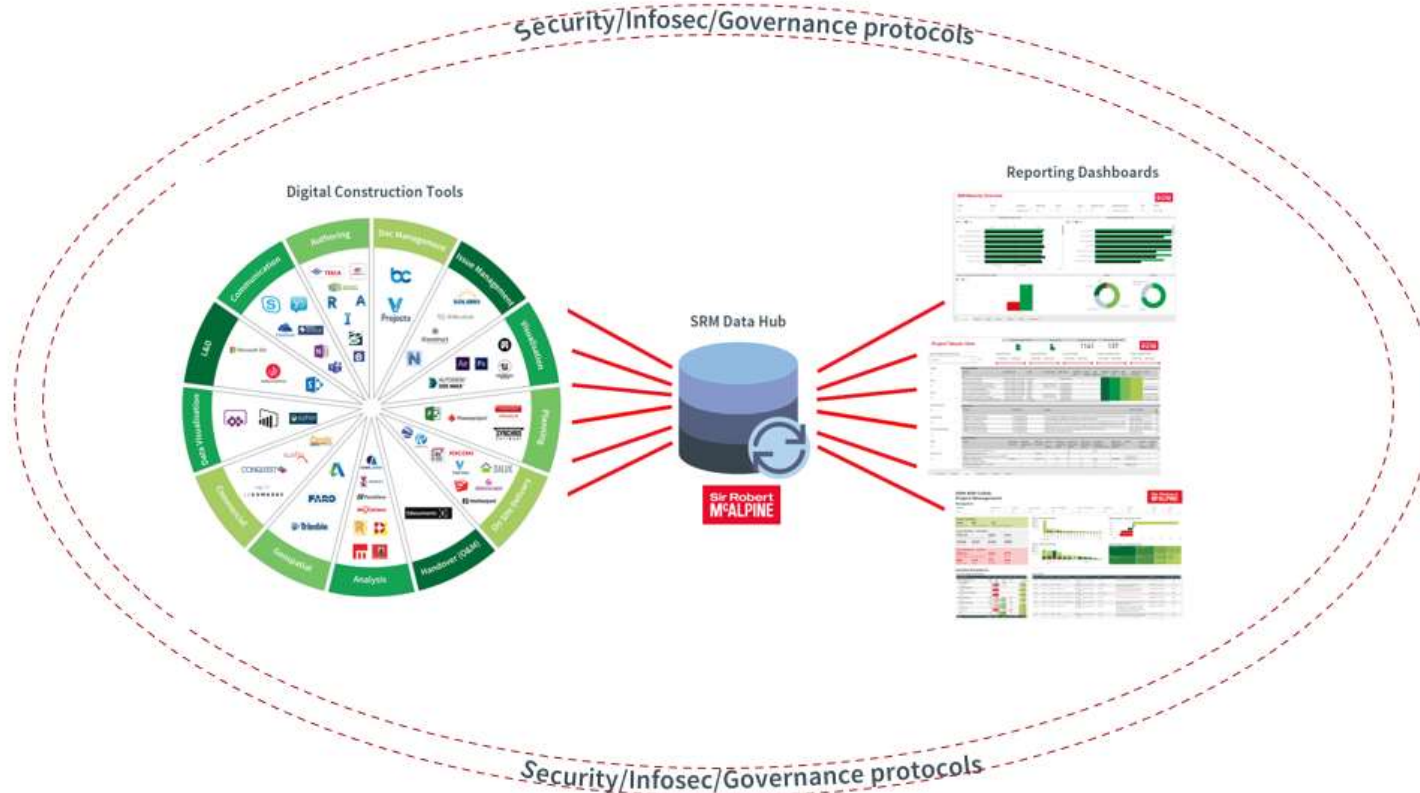

Digital Construction/BIM - Setting us apart

- How we have a **consistent clear strategy (maturity)** in reporting digital construction/BIM delivery across all projects, with data driven metrics now collected over past 3 years
- Having a **internal dedicated Digital construction team** delivering Digital/BIM processes/technologies/data reporting on projects, where we can support and build **our client offering, education, advisory role and build long term relationships**
- How we are **capturing and assessing our supply chain digital capability**, supporting their development and journey
- Showcasing our **involvement with industry** as leaders in innovation initiatives such as projects like the Forge (digital is front and centre & part of Innovate UK) or for example our involvement in UK BIM Alliance communities or sustainability supply chain school initiatives

Looking forward...

- Growing client requirements for Digital and Data, BIM, Smart building, IOT, Digital estates
- Driving continued consistency in how we use digital tools and technology
- Harness more ways of data production to inform greater business decisions and project efficiencies
- Utilise as the foundations for supporting the wider business digital agenda and culture. Improving our efficiencies with less staff in business through digital
- Supports attracting the next generation and how we retain our current talent
- Enhancing awareness of our branding and Communication externally (Business development/Work winning, Client engagement, linkage to Schools/Universities)

Harnessing Data

McAlpine: 25 firms sign up to data-sharing project

6th DEC 2019 | BY CONNOR PRICE

Sir Robert McALPINE

Briefing

- A lesson from Crossrail's mistakes
- A Christmas wish-list: Time to talk turkey
- The collapse before Christmas

NEWSPAPER PRICE >>

Sir Robert McAlpine chief executive Paul Harvey has convinced 25 other companies to join a construction data sharing platform, he told Construction Week.

The Construction Data Trust has been set up to collect and analyse project data with the aim of identifying areas for improvement.

Mr Harvey said that he personally wrote to 40 construction companies, asking them to collaborate on the database, with "around 20" agreeing to take part, a response he described as "swift". The CIO didn't name any of the 25 firms to have signed up.

The trust's first meeting is set to take place early in the new year and Sir Robert McAlpine director of

Ongoing challenges

- Continued communication, awareness and culture of business understanding is required to keep momentum
- Embedding BIM, digital and information management processes further across all functions in the business
- Ongoing training and development to increase digital dexterity
- Adaptability and adherence to industry standards and developments
- Importance around cyber security of information and data

Takeaways

- Embed both a digital and data strategy in the business
- Understand your Client drivers & development partnerships
- Build digital competency in with individual performance indicators
- Use of technology needs to have a purpose and outputs defined
- Provide resources and platform for learning in business
- Reengineer internal processes/procedures aligned with ongoing industry requirements and accreditations
- Focus on your supply chain capability & education
- Continued communication, awareness and culture of business understanding in digitalisation is key

**Sir Robert
McALPINE**
