

# Project Controls Solution at BAE Systems Land UK

## Director TPG The Project Group UK& Ireland

- Over 25 years delivering Project Solutions
- Experience delivering in Aerospace, Defence, Pharma, and Government sectors

Peter O'Neill

## Senior Consultant

- 15 years designing, delivering and supporting project management toolsets
- Microsoft Certified Trainer, PRINCE2 and MSP Practitioner

Anthony Allen

# TPG The Project Group at a glance

## International Experts for Enterprise-Wide Project Control solutions

- Defining and implementing your PPM strategy
- Designing and establishing your PPM solution
- Coaching and operating your solution long-term
- Focus on digital transformation and integration
- Increasing your PPM maturity

# TPG Project Controls Challenge at BAE Systems Land (UK)

# Established, world class Project Controls Processes and Governance

...running on a mix of technical platforms

## The Challenge:

*Build and deploy an Integrated Project Controls solution*

The solution needed to be:

- Fully integrated (no manual treatment or transfer of data)
- Scalable for large projects and volumes of users
- Offer Intuitive User experience
- Tailorable depending on Project type and scale
- Offer comprehensive reporting and dashboards

# Drivers

- Remove excel and 'cottage industries' around reporting
- Standardise definition and reporting outputs across the organisation
- Shift focus from analysing data and inputs to analysing outputs
- Improve speed and quality of decision making
- Improve change control across Projects
- Support trending
- Easily consolidate data by Project, Program, Portfolio and other attributes based on the single source of truth

# Design principles

- Leverage existing investments in Technology stack
- Leverage existing investment in middle ware
- Deliver proven, configurable integration with systems  
e.g. SAP, Predict!, Cobra and in- house, bespoke systems
- Proven to be stable and scalable
- 'Configuration, not-code' design principle, reducing complexity and increasing supportability

# Approach

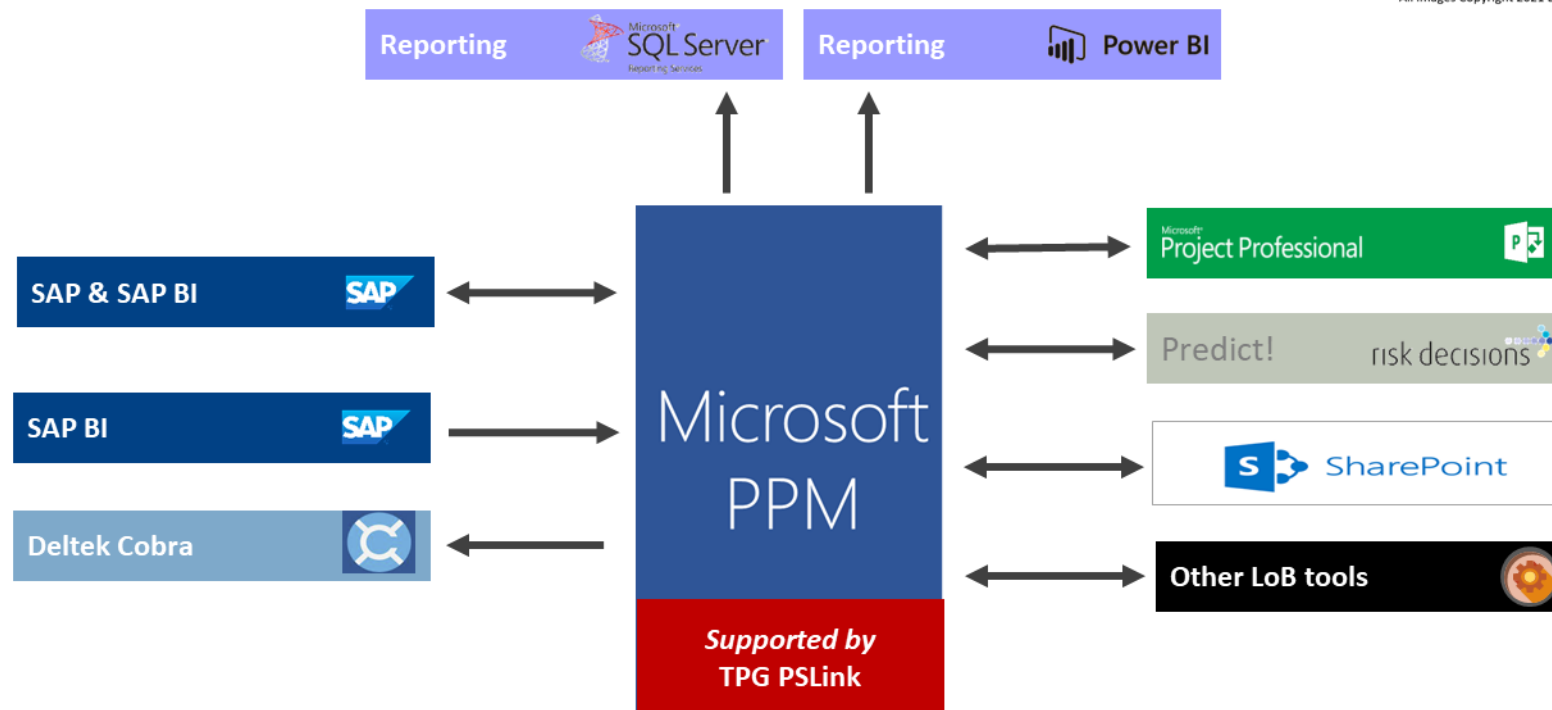

- Process: Well defined and understood, champions in the business
- People: Toolset training augmented process training using a variety of media
- Toolset: designed, fully tested met and exceeded all functional and non-functional requirements

# The solution

## Project Categorisation

### Categorisation Guidance:

- The Project should be categorised as **FULL** if any of the descriptors in the Full (High) column apply to the project.
- If no Full descriptors apply, the Project should be categorised as **TAILORED** if more than one of the descriptors in the Tailored (Medium) column apply to the Project. Where there are several Tailored descriptors relevant to the Project, the PM/CM should consider whether the Project should move to **FULL**. As a guideline three descriptors may combine to make a **FULL** project. This relies on the experience & knowledge of the team involved to make an informed judgement.
- Where no Full or Tailored descriptors apply the Project is **LITE**.

[Click for Existing Categorisation](#)

Criteria	Descriptor	High	Medium	Low	Justification
Product Safety	A Product or Service that could cause unacceptable safety risk to users.				
	The risk that the project will not achieve its objectives due to risks which arise in the integration of critical technologies and / or sub-systems dependant on them.				
Technical	To ensure that the product conforms to the relevant Product Security

## Project Schedule

All images Copyright 2021 BAE Systems – All rights reserved

- Delays to shell production and trail packaging failure are impacting the schedule.

# Additional Capability

**BAE SYSTEMS**

All images Copyright 2021 BAE Systems – All rights reserved

- Central repository for all Project and Resource data.
- Enabling, cross Project cross team analysis can be carried out

# Resource Demand

# Resource Demand

# Project Success

- Solution delivered on-time, under budget
- Successful adoption by users and stakeholders
- Supports further analysis and interrogation of Project Controls data driving not just Project, but Business Unit wide decision making
- Land UK have set a benchmark within BAE Systems for Project Controls and Project Controls toolset deployment, with other business units keen to adopt the toolset and processes
