- International project management experience

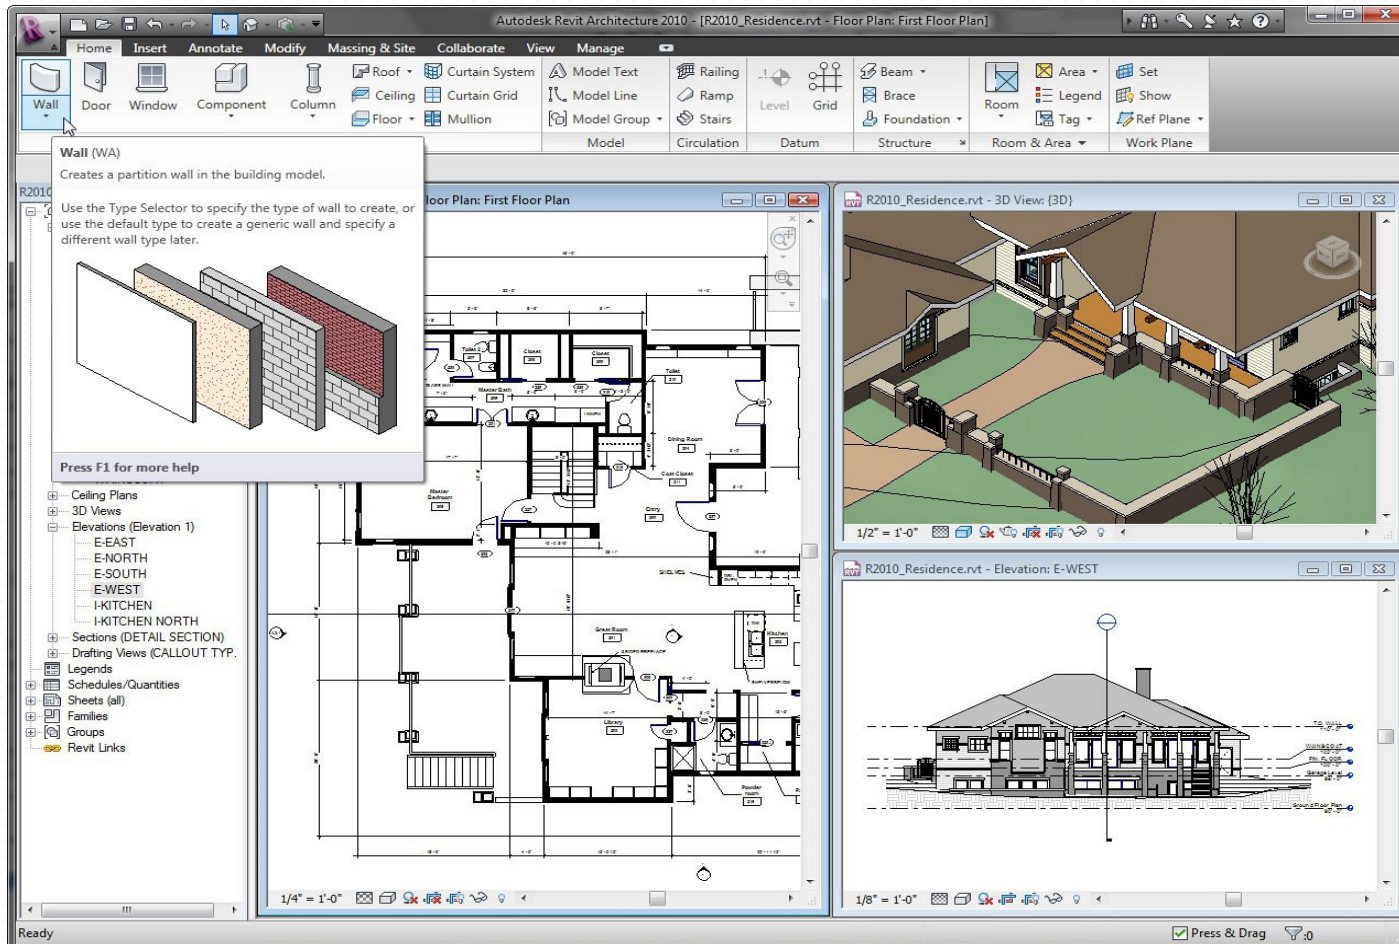

What is Building Information Modelling, and how is it relevant to you?

- What is BIM?
- The foundations of BIM
- Obstacles to a successful implementation
- The role of project managers

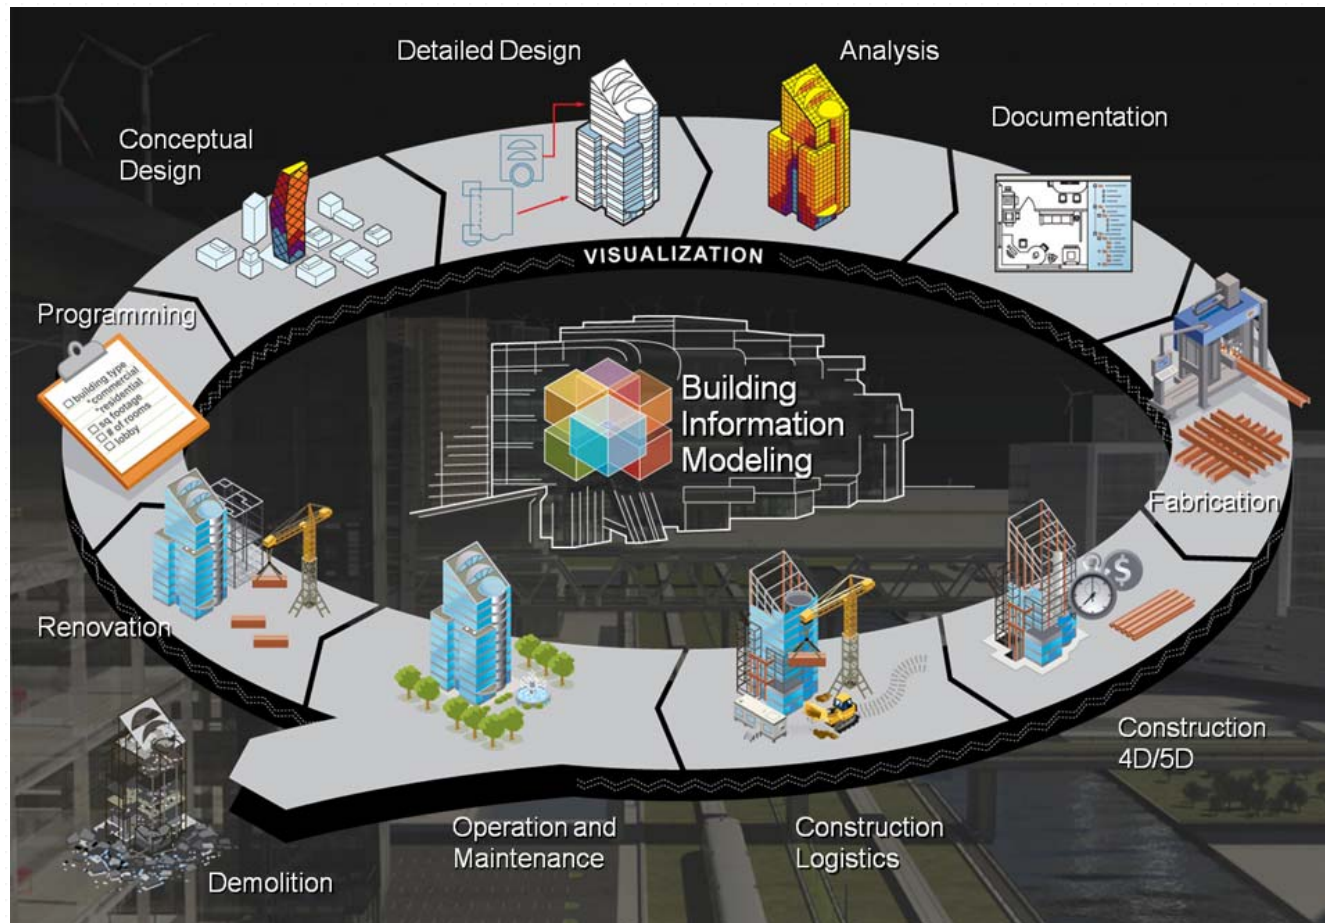

Where it starts

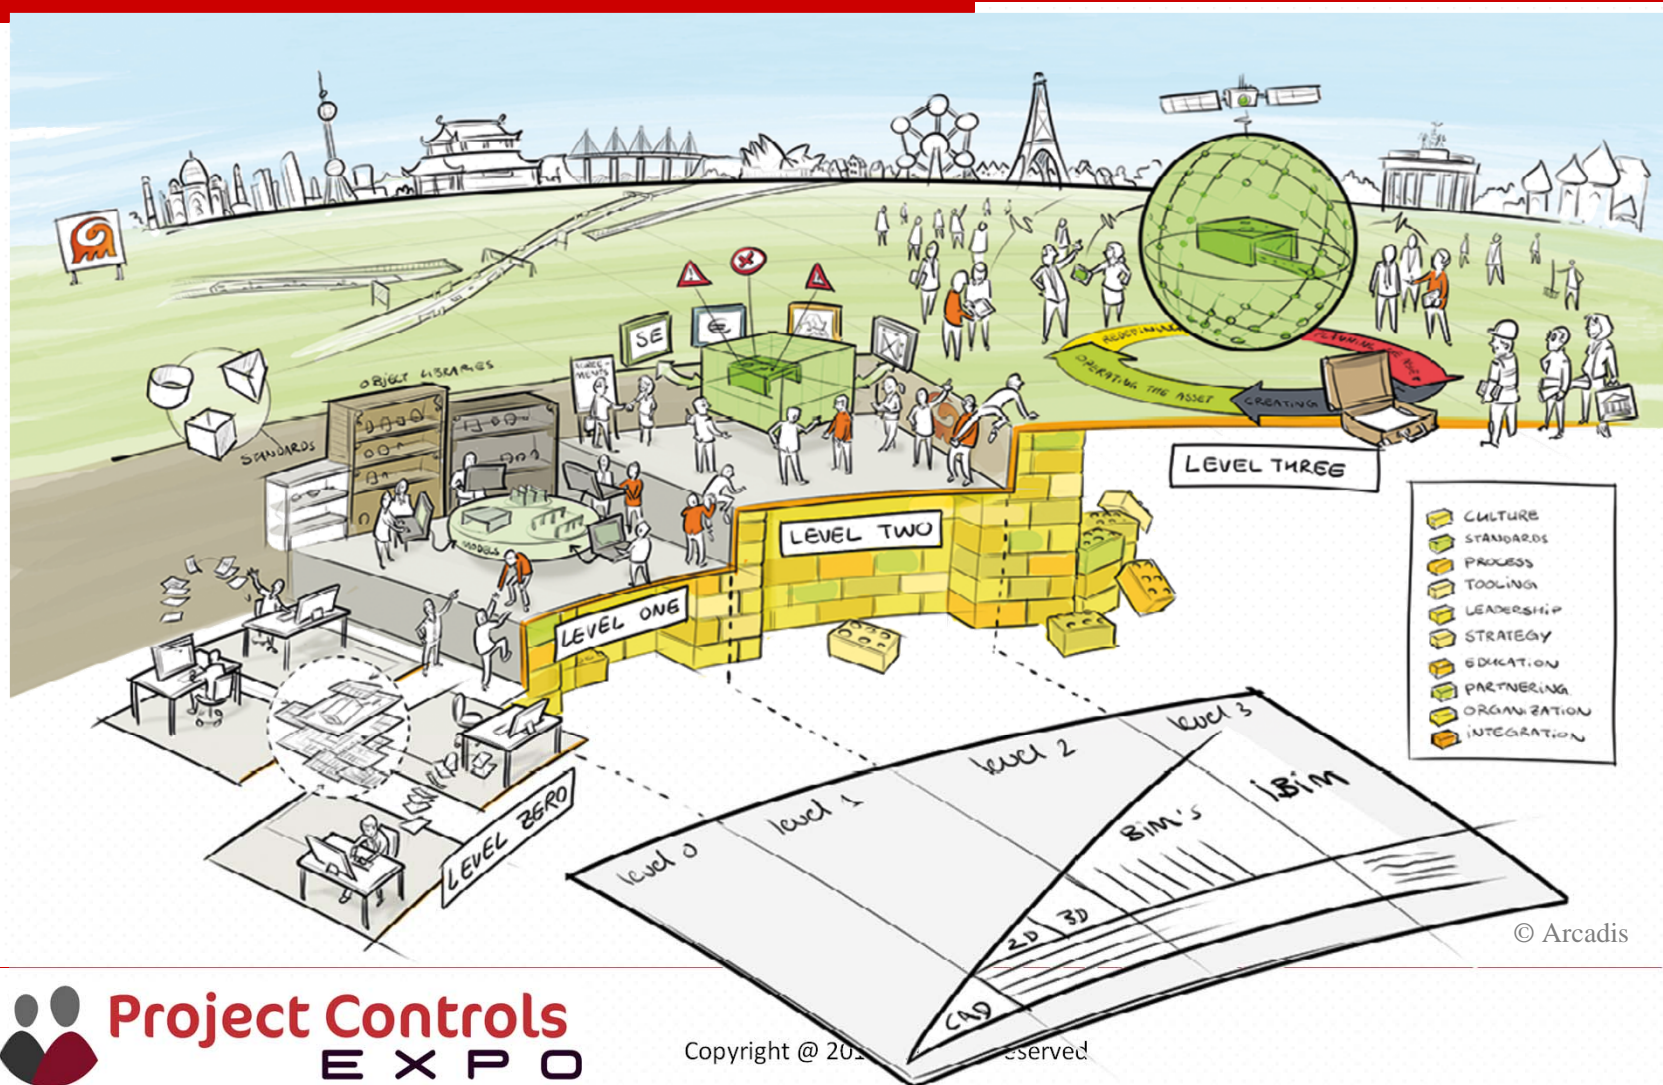

Where it starts

Process – not software

BIM (maturity) Level 2 mandate

I want food

Client expectation

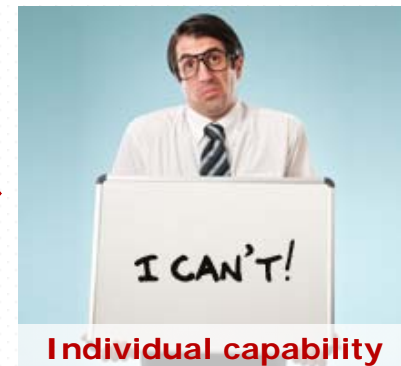

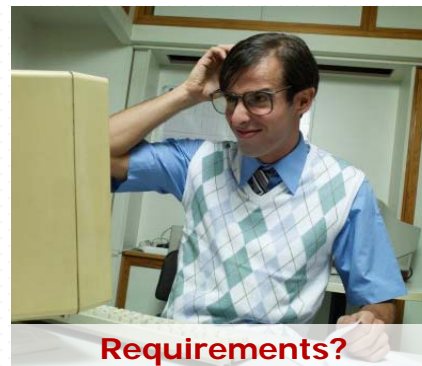

What the architect thought

The right skills and tools

Main challenges

Emerging roles

BIM Leader

(Client advisor, setting the requirements and helping the team to achieve those)

Assurer

(making sure the data and geometry are developed sufficiently and of good enough quality)

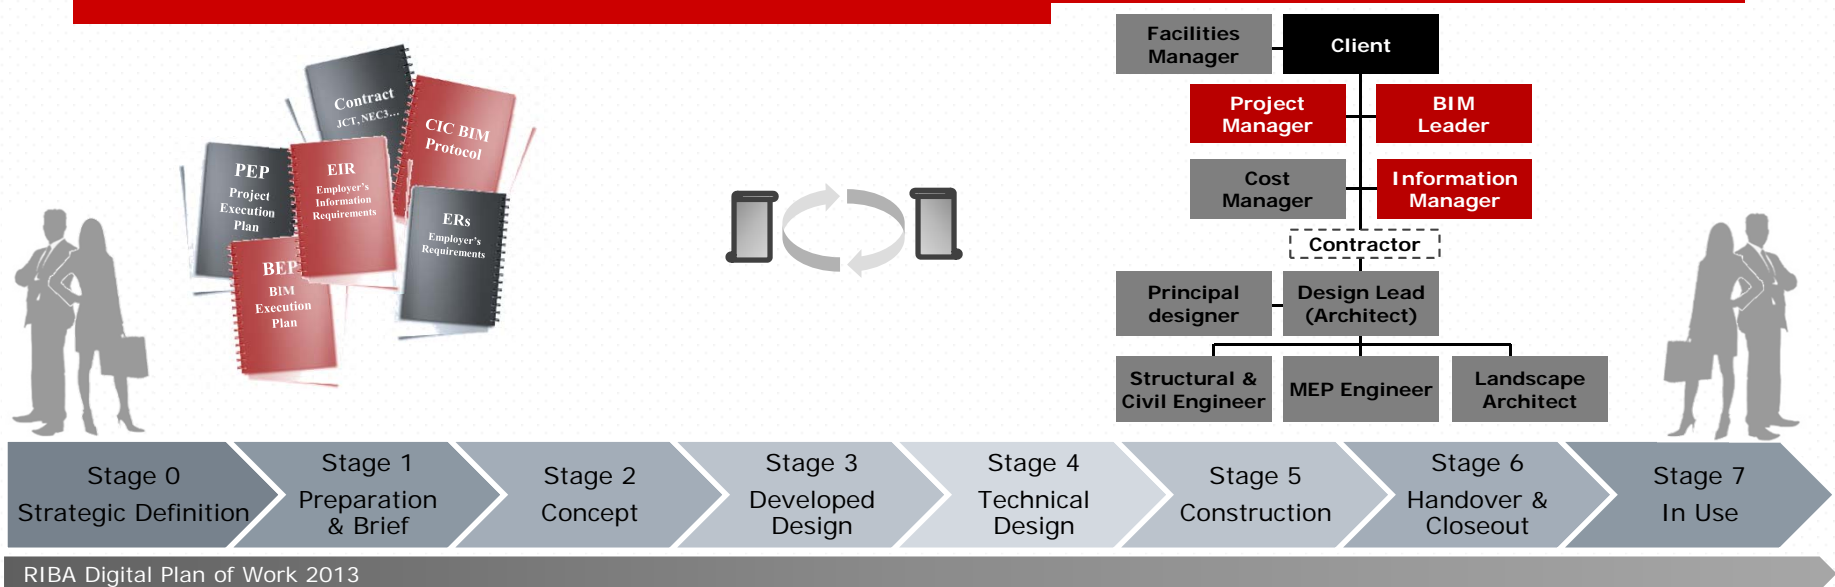

(Setting up and managing the Common Data Environment + managing the flow of information)

Information Manager

Why project managers are ideally placed to lead on BIM
