EcoSys™

Digital Disruption is Coming to Capital Projects

Leave the status quo behind and adopt an Enterprise Project Performance strategy with EcoSys

Real-Time Insights for Confident Portfolio Decisions and Project Delivery

EcoSys is project portfolio management, project controls and project management software all in one platform. Say goodbye to data siloes and slow, error-prone spreadsheets. Say hello to enterprise-wide visibility into what drives project success.

Efficiency, Predictability and Control

Integrate key processes throughout the full lifecycle of projects and portfolios, allowing you to:

- Prioritize the right projects for your organization
- Spend more time on high value work
- Identify issues and forecast project outcomes early
- Make confident decisions based on fast and accurate insights

A promotional graphic for a report. It features the HEXAGON logo and the Project Management.com logo at the top left. The main headline reads "Discover the Secrets of High Performing Projects". Below this, it says "See what over 800 project professionals like YOU had to say in this new report". At the bottom, there is a black button with white text that says "Download Report >". The background of the graphic shows a man in a blue shirt sitting at a desk with a laptop, smiling.

How confident are you, really?

You're about to start the weekend. You've prepared for next week's big project review meeting.

And then the dreaded surprise email arrives

saying your project status really isn't what you thought it was. Can you update the reports in time? Can you support your numbers? How quickly can you course correct?

With **EcoSys Enterprise Project Performance** software, make decisions confidently with tailored insights from accurate, up-to-date data.

Gain efficiency, predictability, and control across your entire project lifecycle – from crafting strategically-aligned project portfolios to analyzing automated, integrated cost reports.

So, how confident are you that your next project experience will be a good one? **See which path looks familiar at:**

CLEOPATRA

9 out of 10 mega projects have cost overruns. Overruns over 50% are not uncommon.

For 25 years, the Project Cost Management solution Cleopatra Enterprise has been empowering organizations to **improve their project performance and avoid cost overruns and schedule delays.**

Cleopatra covers the entire project life cycle by integrating functionalities for **cost estimating, scheduling, work package management, cost control, field change management, benchmarking,** and more.

- Developed by certified cost engineers
- Supports AACE's Total Cost Management approach
- Used on projects/turnarounds by asset owners, (engineering) contractors, and governments
- Extensive interfacing capabilities with tools such as Excel, Primavera, and SAP
- Enables you to work faster and more accurately at the same time

Primaned and HKA are Global Partner to PMWeb in the field of advice, sales, implementation, and training.

PMWeb's best-in-class Capital Project Management Software solution has been built from the ground up for owners and construction professionals to handle the full life cycle needs of Plan, Build and Operate in a user-friendly web-based platform.

Whether used by construction or IT professionals, facility owners/operators or property managers, PMWeb offers an unparalleled combination of access, collaboration and control.

Where many project organizations struggle to have an overview of their portfolio of projects, they can't act quickly because it isn't clear who to act on or many project documents are stored in different locations; PMWeb offers a "Single Source of Truth" within the project environment.

Benefits with PMWeb:

- Improved productivity and reduced management resources
- Reduced risk of overuse through better control
- More consistency and compliance
- Better visibility and informed decision-making
- A single source of truth for all processes and data
- Less effort to maintain business systems
- Lower business costs
